Education

Seneca Polytechnic — North York, ON
Advanced Diploma in Computer Programming and Analysis — *Expected Dec 2026*

BBIT College — Gujarat, India
Diploma in Computer Engineering — *Jul 2022*

Experience

Data Analyst Intern (Co-op) — Jan 2026 - Apr 2026
AI Financial Power Group Limited — *Markham, ON*

- Designed and implemented a centralized **SQL Server** campaign tracking database capturing transaction sources and campaign attribution across **15+** campaigns to improve marketing and transaction-level reporting.
- Collaborated with directors and managers to gather business requirements, design **ER models** in Draw.io, and deploy **10+** normalized database schemas in **SQL Server** using **SSMS**.
- Reverse-engineered **5+** undocumented production databases and executed complex **SQL queries** to analyze schema relationships, data dependencies, and system workflows.
- Developed **SQL production views** comparing **5 years** of NYSE/NASDAQ market data against internal fund performance, and built **2 stored procedures** deployed to the production server to automate financial reporting.
- Integrated SQL views with **Excel Power Query** to automate refreshable dashboards for daily, monthly, and yearly performance analysis.
- Built automation scripts using **Python (Pandas)** to aggregate client data, generate **20+** structured PDF reports, and reduce manual reporting effort.

Projects

CampaignLens: Campaign Attribution & Analytics | *PostgreSQL, PL/pgSQL, Docker* — *In Progress, 2026*

- Designed a normalized **PostgreSQL 17** database of **27 tables** across **5 schemas** modeling a campaign-to-investment funnel for a Canadian investment firm (KYC, AML, CASL consent).
- Enforced data quality with **CHECK constraints**, a case-insensitive unique email index, soft deletes, and a reusable **PL/pgSQL** trigger that maintains audit timestamps.
- Containerized the setup with **Docker Compose** (persistent volumes, health checks) for one-command startup; versioned SQL migrations, data dictionary, and ERD in **Git**.
- Currently building the remaining campaign, advisor, and transaction tables and generating sample data to complete the end-to-end attribution funnel.
- Next phase: reporting **views** for funnel drop-off and campaign/channel ROI, **row-level security** for advisor access, and **Python (Pandas)** analysis with charts.

Online Movie Ticket Booking System | *PHP, MySQL, JavaScript, HTML/CSS*

- Developed a responsive movie ticket booking platform with real-time seat availability, scheduling, and secure user authentication.
- Built backend services using **PHP** and **MySQL** to manage bookings, customer data, and transaction workflows.

Blood Bank Management System | *SQL Server*

- Designed and implemented a relational database system with **8+** tables to manage blood donations, inventory tracking, and reporting processes.
- Created **20+** advanced SQL queries, ER diagrams, and documentation to improve data management and reporting accuracy.

Certifications

Certificate of Achievement – Data Analyst Internship | *AI Financial Power Group Limited* — May 2026
PostgreSQL Essential Training | *LinkedIn Learning* — Sep 2026

Technical Skills

Languages: Python, Java, C, C++, PHP, JavaScript, SQL, PL/pgSQL
Databases: SQL Server, PostgreSQL, MySQL, Oracle SQL, MongoDB, DB2
Tools & Platforms: SSMS, pgAdmin, Docker, Git/GitHub, Excel Power Query, Azure, VS Code
Core Skills: Database Design, Schema Design, ER Modeling, Normalization, Data Analysis, Data Cleaning, Query Optimization, ETL Concepts
