EDUCATION

Seneca Polytechnic

Advanced Diploma in Computer Programming and Analysis

North York, ON

Expected Dec 2026

BBIT College

Diploma in Computer Engineering

Gujarat, India

Jul 2022

EXPERIENCE

Data Analyst Intern (Co-op)

Jan 2026 – Apr 2026

AI Financial Power Group Limited

Markham, ON

- Designed and implemented a centralized **SQL Server** campaign tracking database to capture transaction sources and campaign attribution, improving visibility into marketing performance and transaction-level analytics.
- Collaborated with directors and managers to gather business requirements, refine **ER models**, and deploy normalized database schemas using **SSMS** and Draw.io.
- Reverse-engineered undocumented production databases and executed complex **SQL queries** to analyze schema relationships, data dependencies, and system workflows.
- Developed **SQL production views** comparing **5 years** of NYSE/NASDAQ market data against internal fund performance metrics for financial reporting and benchmarking.
- Integrated SQL views with **Excel Power Query** to automate refreshable dashboards and streamline daily, monthly, and yearly performance analysis workflows.
- Built automation scripts using **Python (Pandas)** to aggregate client data, generate structured PDF reports, and reduce manual reporting effort.

Database Intern

Jan 2022 – Jun 2022

Tata Consultancy Services (TCS)

Ahmedabad, India

- Designed and optimized SQL databases for internal business applications, improving query efficiency and data retrieval performance.
- Created validation and data-cleaning scripts to ensure data consistency and accuracy across multiple datasets.
- Collaborated with backend developers to support database operations, reporting workflows, and ER diagram documentation.

PROJECTS

Online Movie Ticket Booking System | *PHP, MySQL, JavaScript, HTML/CSS*

- Developed a responsive movie ticket booking platform with real-time seat availability, schedule management, and secure user authentication.
- Built backend services using **PHP** and **MySQL** to manage bookings, customer data, and transaction workflows.

Blood Bank Management System | *SQL Server*

- Designed and implemented a relational database system to manage blood donations, inventory tracking, and reporting processes.
- Created advanced SQL queries, ER diagrams, and structured documentation to improve data management efficiency and reporting accuracy.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, PHP, JavaScript, SQL

Databases: SQL Server, MySQL, Oracle SQL, MongoDB, DB2

Tools & Platforms: SSMS, Git/GitHub, Excel Power Query, VS Code, Eclipse, Azure

Core Skills: Database Design, ER Modeling, Data Analysis, Data Cleaning, Query Optimization, ETL Concepts
